

Welcome to the Child & Family Provider Network! You join fellow colleagues in advancing the critical position that a network of care with treatment options is critical in the welfare of children and families.

We meet monthly and there are many opportunities to participate on committees and other activities. We are a diverse organization that shares a common goal: to ensure that quality treatment services to children and families remains a high priority in the State of Maine. We look forward to your participation in our Association and to the positive impact you can make.

Jill Allen, MS
CFPN President

Mission

The Mission
of the Maine Provider Network
is to improve the quality of services
for children and youth, and families.

We educate, inform, and support
member agencies through training,
networking, and collaborating
with governmental and other organizations that
share common interests in the
well-being of children and families of Maine.

Values & Beliefs

What we believe about children & youth:

- All children & youth are entitled to a safe childhood.
- All children & youth have strengths, capabilities, & inherent self-worth, and should be treated with dignity and respect.
- Children & youth have little voice in our society. They need well-informed and responsible adults to look out for their best interests.
- Children & youth who are receiving treatment benefit from understanding how their relationships with members of their biological family and substitute families have an impact on their growth, development, and ability to achieve their personal goals.

What we believe about ourselves and how we do our work:

- Providing opportunities for personal growth & professional development is a high priority.
- Collaborating & sharing information allows us to improve the quality of services to our diverse populations.
- We strive to create a climate of trust, openness, and respect in our meetings and in our work.
- We engage in unified efforts to improve services, and organize ourselves around common causes to enhance our effectiveness.
- We make decisions by consensus, and will not undertake projects or tasks, which we cannot unite behind.
- We believe in the idea of shared responsibility and to that extent possible, recipients of our services should be active participants in planning and implementation of those services; and
- The idea of shared responsibility applies to our membership and to the children & youth in our care.

Dear Members:

It is time again to renew your membership in the Child & Family Provider Network and we look forward to your continued involvement.

For the benefit of potential new members, let me introduce CFPN. The Provider Network is a group of agency leaders and administrators who come together on the first Friday of every month to discuss issues of mutual interest. This has included our relationship with state agencies, training opportunities, funding, and Medicaid changes and regulations.

Our Mission is to improve the quality of services for children, youth, and families. We educate, inform, and support member agencies and their representatives through training, networking, and collaborating with government and other organizations that share a common interest in the well-being of children & families of Maine.

Membership dues are \$400.00 annually. Your membership provides the following benefits:

- The ability to learn and partner with PMNI, OCFS and DHHS systems
- The ability to network with other providers
- The opportunity to collaborate with licensing department leadership and staff
- The ability to meet with various State Department Heads
- The ability to participate in the CFPN Annual Meeting and Conference
- Professional affiliation with National Agencies
- To participate on State Collaborative Committees
- Agency link and information on the CFPN website

We look forward to your participation. We are confident this will be an exciting opportunity to support, learn and collaborate with others in the same profession.
